

THP DETECTOR ACCESSORIES [SUMMER 2024]

Gold Detector Accessories designed and manufactured in-house by THP right here in Victoria's Golden Triangle. Tested by professional prospectors in the Victorian and Western Australian Goldfields.

GPX Accessories

GPX SERIES SWING ARM HINGE

SKU: gpx-swing-arm-hinge

The GPX Series swing arm hinge is a direct replacement for the Minelab GA10 hinge, utilising the existing swing arm shaft. The hinge fits all Minelab GPX series detectors.

BUNGEE CLIP HARNESS [6mm]

SKU: bungee-clip-harness-6mm

The bungee clip suits 6mm shock cord and clips onto your harness.

GPX 6000 COIL RUBBERS

SKU: gpx6000-coil-rubber

The GPX 6000 coil yoke washers will wear over time causing your coil to move around freely. These yoke washers are designed to wear rather than the detector shaft or coil. Pack of 4

GPX SERIES BUNGEE CLIP [SHAFT]

SKU: gpx-bungee-clip-shaft

The Bungee clip clamps to the detector shaft using a nylon bolt and won't slide up the shaft as the Velcro-style bungee adapter does. The hook on the bungee clip allows quick disconnect of the bungee and is tight enough to stop the bungee from falling off.

GPX 6000 SHAFT CLAMPS

SKU: gpx6000-shaft-clamps

The new shaft clamps are designed to replace the standard clamps on both the upper and lower shafts of the GPX 6000. No more twisting of the coil with these newly designed clips as they have a positive friction grip on the carbon fibre shaft. The clamps also re-use the existing shafts allowing the detector to fully collapse. Pack of 2

GPX 6000 CABLE PROTECTOR

SKU: gpx6000-cable-prot

The Cable Protector clips onto the detector control box to help protect both the coil plug and control box socket from damage. Breaking a coil cable or even the control box plug can mean an expensive repair bill, this protector will help prevent that from happening.

GPX SERIES/NOX SCOOP HOLDER

SKU: gpx-series-scoop-clip

This gold scoop holder has been designed to securely attach your scoop to the detector shaft for easy carrying. Reduces the chances of losing your scoop and frees your hands. Also suites any detector with a 22mm shaft.

GPX 6000 SPEAKER HORN

SKU: gpx6000-speaker-horn-sl

The speaker horn has been designed to direct the sound toward the prospector instead of out the back of the detector. It can be difficult to hear the target when using the scoop on the coil, the horn will help with sending the sound toward you.

GPX 6000 SCREEN COVER

SKU: gpx6000-screen-cover

The protective GPX 6000 cover makes it easier to see the screen on bright days. It also helps protect the screen from bumps and scratches.

GPX SERIES/NOX CABLE CLIPS

SKU: gpx6000-screen-cover

The cable clips have been designed to follow the natural contour of the cable when wrapped around the shaft. Suits both left and right wound coil cable. Pack of 8.

GPX 6000 DETECTOR STAND

SKU: gpx6000-stand

Protective stand designed to keep your detector up and out of the dirt. Also adds extra stability helping prevent it from tipping over. Works with open back detector covers.

GPZ Accessories

GPZ7000 SWING ARM HINGE

SKU: gpz-swing-arm-hinge

The GPZ7000 swing arm hinge is a direct replacement for the Minelab GA10 hinge, utilising the existing swing arm shaft. The hinge fits the Minelab GPZ7000 series detector.

GPZ7000 SCOOP HOLDER

SKU: gpz7000-scoop-clip

This gold scoop holder has been designed to securely attach your scoop to the detector shaft for easy carrying. Reduces the chances of losing your scoop and frees your hands. Attaches to the upper shaft.

SDC 2300 Accessories

SDC 2300 SCOOP HOLDER

SKU: sdc-scoop-clip

The gold scoop holder attaches securely to the upper shaft and securely holds your scoop for easy carrying. The clip still allows the detector to fully fold up.

SDC 2300 SOUND HORN

SKU: sdc-sound-horn-sl

The speaker horn directs the sound up and forward towards the operator. Slimline design to suit Left-Right-Handed people and fits under detector covers.
